Our students have the unique advantage of being part of the College of Arts, Media and Design at Northeastern University, a world-class research institution in Boston. The city’s history of innovation in environmental design as well as its legacy of urban redevelopment provides a rich backdrop and laboratory of urban, infrastructural, and ecological prototypes which ideally position our programs to creatively and critically explore local issues with global implications.

GRADUATE STUDIES

SCHOOL OF ARCHITECTURE

Northeastern University
College of Arts, Media and Design
360 Huntington Avenue | Boston, MA 02115
The School of Architecture received its initial professional accreditation from the NAAB for the Master of Architecture degree in January 2003. The most recent NAAB visit occurred in 2012. Per the NAAB:

“In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accreditation Board (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

The NAAB grants candidacy status to new programs that have developed viable plans for achieving initial accreditation. Candidacy status indicates that a program should be accredited within six years of achieving candidacy, if its plan is properly implemented.”

Masters degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree by itself is not recognized as an accredited degree.

Graduate study in Northeastern University’s School of Architecture focuses on innovative and sustainable solutions to today’s urban challenges.

Using the city of Boston as a live laboratory, our programs in Architecture and Sustainable Urban Environments let students develop creative and entrepreneurial solutions to complex problems facing designers in the contemporary city.

Scholarships & Financial Support
Graduate School scholarships and graduate assistantships are available to students in the College of Arts, Media and Design.
