

Music & Health Research

The Music & Health Research path highlights courses that explore the relationships between music, mind, and body, as well as courses that address how understanding such relationships can benefit society. This path is especially suited to students who are also pursuing premed requirements, as outlined here: <https://undergraduate.northeastern.edu/prehealth/academics/overview/> Students interested in this path may also wish to consider a combined major in Music & Psychology.

Path advisor: Psyche Loui ([faculty bio & contact info](#))

About BA in Music paths:

- BA in Music students are not required to follow one path, but are encouraged to explore them and consult relevant path advisors as they discover their passions and the field’s possibilities.
- All paths assume that the student will take MUSC 1000 Music at Northeastern, and MUSC 1001 Music in Everyday Life.
- The number of music electives recommended may exceed the number of music electives required for the major (4).
- Recommended non-music electives do not count toward major requirements.
