

20
24

The background features a gradient from light blue at the top to yellow at the bottom. It is overlaid with several semi-transparent rectangular and circular shapes in shades of blue and green. Scattered throughout the background are various mathematical symbols, including pi (π), infinity (∞), percent (%), less than or equal to (≤), and less than (<).

Exemplary Student Work

Graduate Creative and Research Project Awards

Elijah Nicholson-Messmer, Media Innovation and Data Communication, MS

What are apartment bidding wars costing you?

With a lack of housing and ramped-up competition, paying over the asking price is becoming an inescapable reality for many prospective tenants in Greater Boston. To tell this story, the project analyzed data of 4,000 apartments across Greater Boston that were rented in the months leading up to September 1st, 2023. Readers can also search their ZIP Code to learn how rent bidding is impacting their neighborhood. The story includes interviews with renters, real estate professionals, and policy experts to learn more about why and how this practice is happening.

Chloe Hudson Prock, Information Design & Data Visualization, MS

Inviting Engagement: Metaphorical data visualization for socio- environmental issues

A series of projects that employ data visualization to illuminate complex global issues, from climate risk and greenhouse gas emissions to the trade of worn textiles and textile waste. These projects aim to offer insight into the social factors contributing to inequality in the context of environmental pollutants and climate change, and to explore how using symbolic visual forms in data visualization can help disrupt cognitive dissonance and a sense of despondence around troubling topics like climate change.

Undergraduate Creative and Research Project Awards

Nikola Angell, Communication Studies, BA

NUPD Caller Crisis Training

Through synthesizing Dr. Kevoe Feldman's expertise in crisis management and Nikola's shared interest in police communication work, they both embarked on exploring the intersectionality of crisis communication, organizational communication, health communication, disaster management, and interactional linguistic analysis covered in the core communication studies major. Together they reviewed case studies with real-world 9-1-1 call transcripts to examine crisis situations whilst applying crisis management principles. The culmination of their work provided a four-hour training session for NUPD call-takers. The training's purpose was to use real-world data to explain the importance of caller-management and operational policies within emergency management organizations, decision-making and ethics in the field, and mental-health de-escalation tactics.

Exemplary Student Work

Gigi Barnett, Criminal Justice and Journalism, BS

Why TV executives should listen to their interns

This Storybench article showcases the experience of NBC Chicago interns as they presented a pitch to company managers. Their mission? To transcend traditional news platforms and captivate audiences spanning various age demographics. NBC leadership, inspired by the interns' initiative, elevated the concept by introducing a dynamic, commercial-style newscast on their streaming platform. This resonates deeply with Gigi's research alongside Professor Mike Beaudet and the Reinventing Local TV News Project, which emphasizes the significance of pioneering storytelling techniques in contemporary media landscapes.

Jasmine Bryant, Music with Concentration in Music Industry, BS

Composer/Pianist

Jasmine Bryant has had several performances and readings of her works by the Northeastern University Wind Ensemble as their first-ever composer-in-residence, as well as by the Delaware All-State Band as their guest composer in 2023, by solo players in student recitals around the country, and at the Juilliard School through the Juilliard Summer Composition Intensive and Juilliard Extension. Included in the works performed and read by Northeastern University are Saharan Dusk (2022), River Ghoul For Wind Ensemble and Featured Clarinet (2022), Bliss (2018/2023), Central Park Spring (2023), and piano concerto Whirlwind (2024).

Liza Granoë, Mechanical Engineering and Design, BSME

Practice Period

Tampons are one of the most common methods of absorbing period blood but can be challenging to learn. Many women have expressed experiencing extreme discomfort the first time they used a tampon because of a lack of understanding of how to insert it. Practice Period is a product aimed at people who do not know how to use tampons that provides tampons, written information on best practices, and an area with a mock vagina to practice tampon insertion so users can develop the muscle memory to use on themselves.

Exemplary Student Work

Ethan Matthews, Architecture, BS

Architecture and Land: Away from an Extractive Paradigm

The project examines architectural representation conventions and how drawing techniques can shape, and improve, our relationship with land. Largely referencing indigenous research and traditional ecological knowledge, the drawings investigate different methodologies of representing kin, land, and time. If architects drew and specified materials differently, could we have a more reciprocal and respectful relationship with our native ecologies? If land were represented as a palimpsest of non-human beings and land throughout time, would our designs be more animated and generative? Methodologies like these have the potential to reshape how designers consider building through an ethical and climate lens.

Undergraduate Group Creative and Research Project Award

Makenna Harnden, Donovan Holt, and Hannah Marks, Department of Theatre

Exception to the Rule

Donovan, Hannah, and Makenna were members of the production team for Exception to the Rule by Dave Harris, a collaboration between Northeastern University, Front Porch Arts Collective, and Suffolk University. This production follows six Black high schoolers diving deeper into what it means to be black during a detention period. This was an opportunity for the three to connect deeper to the Department of Theatre curriculum, and an opportunity for them to receive professional credits as a Light Designer (Makenna), Production Stage Manager (Hannah), and Director (Donovan).

Experiential Education Awards

Gavin Gershman, Architectural Studies, BS

Vernacular

To better understand how designers can uphold locally specific community heritage through stakeholder engagement, two cultural regions – the homes of the Ainu First Nation (Japan) and Wendat First Nation (Canada) people – were chosen for their similar climactic conditions and access to natural resources. Despite similar situations, their differing cultural values manifest in two distinct dwelling styles. This project aims to examine how cultural differences are expressed architecturally. Producing a framework of design supplementing the common practice of engaging with stakeholders through design.

Exemplary Student Work

Cassandra Lanson, Environmental Science and Landscape Architecture, BS

NOURISHLAND

NOURISHLAND examines Boston's landscape evolution from 1600 to the present through the lens of food systems. The Shawmut Peninsula has widened, narrowed, shifted, and straightened over time. NOURISHLAND asks how food systems, the growing, processing, distributing, and disposing of food, influence this landscape change. Through 27 interactive cards grouped by food system or historical narrative, people can overlay the landscape's past on a map of modern Boston. Each narrative corresponds to online audio that provides additional commentary. Through exploration, people can understand how what we eat shapes where we are.

Liam Martley, Music with Concentration in Music Technology, BS

Eighth Day Sound

Liam's co-op with Eighth Day Sound led him to touring with some of the biggest names in the music industry. From the Re:SET concert series to Shania Twain's Queen of Me tour, Liam traveled across the country flying PA for concerts on a nightly basis. His role involved everything from hanging massive speaker arrays to miking instruments and running cables. When he wasn't on the road, Liam worked in the shop, where he helped to maintain the equipment and prepare it for tours.

Ziyu Peng, Media Innovation and Data Communication, MS

Dance to your Heartbeat

The label of disability places unnecessary limits on the capabilities people possess. This short documentary on a Deaf hip-hop dancer's journey shows how an elastic heart breaks free from limitations, stereotypes, and self-denial. Through a storytelling approach centered on sign language images, the video becomes not only more accessible but also fosters a closer connection with the audience. Stories on disability justice are the torch of humanity that light up the path toward a more inclusive, and equal future.

Exemplary Student Work

Dean's Special Recognition Awards

Tessa Baum, Design, BFA

Immersive Designs and Responsible Futures

Tessa focuses on designing brands and interventions that are immersive and push interactive conventions. Tessa's multidisciplinary body of work activates unique inquiry in brand strategy, human experience and communication, user accessibility, physical craft, and design research. Alongside her design practice, Tessa supports the vast network of Scout as a proponent of student and design leadership. During her time with Scout, she has worked to translate thoughtful design practices into the languages of entrepreneurship and business. Above all, her pieces exemplify building beyond bounds and aim towards crafting more responsible futures.

Marta Hill, Journalism, BA

Unseen sides of journalism: harassment and forgotten female journalists

Through work in CAMD, Marta has explored two different areas of journalism. Funded by a CAMD Dean's Honors scholarship, she worked with assistant professor Meg Heckman on a project that aimed to identify forgotten women in the Boston Globe's history. Together, they searched through the Globe's archives and are perusing interviews with a number of journalists. Separately, for an Honors in the Discipline project, Marta dug into how journalism schools should teach their students about the harassment they may face in the industry.

Graham Moitoso, Architecture, BS

Public Participation in Urban Design and Planning

Through projects such as the Chelsea Cool Block installation, the New Bedford Green Infrastructure Master Plan and the Blue Hill Ave Transportation Action Plan, Graham explored how residents in historically environmentally burdened neighborhoods could participate in the redesign of their built environments to promote access to public transit, community-building and improved public spaces.

Ethan Wayne, Communication Studies, BA

The intersection of reality and media from a mixed methods perspective

Ethan completed two majors research projects while here at Northeastern: One investigated the Kelce-Swift relationship and how the media portrayal, narrative construction, and personal branding contribute to the cultivation of dedicated fans, drawing parallels between the worlds of athletic achievement and musical stardom. In a second study, Ethan investigated how nonverbal cues like tone, volume, and body language affect de-escalation efforts and verbal instructions from uniformed police officers, as well as how the nonverbal cues of suspects affect standoffs and conflicts.
